TOP SECRET

DEFENSE INTELLIGENCE AGENCY
WASHINGTON, D.C. 20301

MEMORANDUM FOR THE CHAIRMAN, ICRS 5 June 1972

SUBJECT: Photographic Coverage of Coastal Areas of the People's Republic of China

1. The Defense Intelligence Agency has a high interest in People's Republic of China (PRC) activities relating to possible logistics or naval support to North Vietnam.

2. Photographic coverage of South China coastal logistic routes, installations and of other coastal ports and shipping can provide high priority information required to evaluate PRC logistic support to North Vietnam. Coverage of PRC naval facilities will improve our capability to assesspossible PRC naval support to North Vietnam. Of particular interest now is an area east of the Luichow Peninsula where 5 PRC minesweepers have been conducting exercises (see attached for additional details).

3. It is believed that oblique CHURCH DOOR coverage can provide valuable and timely intelligence conerning PRC logistic and naval activity. Enclosure 2 is a listing of important coastal objectives.

4. It is requested that these requirements be forwarded to the CIA for collection as practicable with IDEALIST assets. The area between the Luichow Peninsula and Schangchuan Inland is of highest priority.
